

Executive Statement

Affected scope

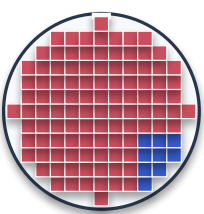

Affected vs paired-reference yield

Affected edge-band yield

Affected die yield

113 observations · 0 missing · Value 91.8 to 98

N · NOTCH

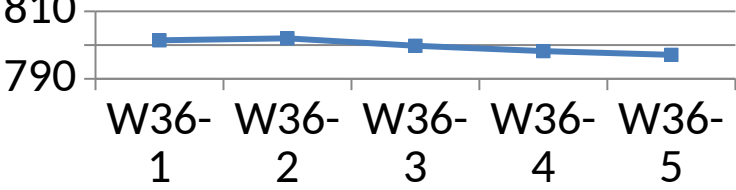

MEASURED VALUE

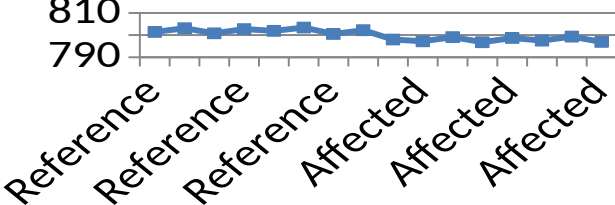

91.8

98

Process stability and specification

Control versus affected distribution

Verified finding

Process Flow

Excursion signal

Compare affected and reference

Verify chamber mechanism

Confirm corrective action

Measure	Affected	Reference	Review
Edge-band yield	91.8%	98.0%	Contain pending matched rerun
Film thickness	798.0 nm	802.1 nm	Check endpoint calibration
Pressure offset	+2.4 kPa	Baseline	Association only; verify

Corrective action
