

Executive business review

Fresh CHG-173 R2

01 Executive summary

Retention improved for a second quarter, but the public sector renewal gap still threatens FY26 expansion.

FY26 Q1–Q4 close · enterprise and public sector portfolios · constant-currency bookings · renewal cohort excludes acquired accounts.

02 Performance

Constant-currency bookings

14.1 \$M

03 Analysis

Quarterly retention

Line Chart: 4 rows · X Quarter · Y Retention · 3 fields

Bookings by quarter

Line Chart: 4 rows · X Quarter · Y Bookings · 3 fields

04 Regional evidence

PORTFOLIO	RENEWALS	RATE	EVIDENCE / RISK
Enterprise North	1842	94.1%	Above 91% guardrail; stable cohort
Public Sector West	684	84.7%	Two contracts delayed; budget gated
Strategic Accounts	213	92.9%	FY26 Q4 close; largest renewals drive bookings

05 Decision

!

Hold public-sector expansion until the renewal gate clears

Two delayed procurement cycles remain unsigned. Keep the current enterprise plan and review those contracts at the next finance checkpoint.

Watch

06 Decision and next step

✓

Next step: keep the enterprise hiring plan, but release the public-sector expansion budget only after the named renewals are signed.

Accepted CHG-181 R2 baseline

01 Executive summary

Revenue grew across all three regions. Retention improved in the West, while the South remains below the 95 percent target.

Experiment decision

Fresh CHG-173 R2

01 Experiment summary

The reminder increased completion, although the week-four uplift is not enough to rule out a novelty effect.

Experiment E-26-041 · eligible new accounts · randomized 1:1 · four weeks · 12,804 assigned · conversion measured within 7 days.

02 Performance

Completion · control to treatment

Before21.8%

After24.8%

Treatment completion24.8%
Delta 3.7

Target 25%

03 Analysis

Treatment completion rose from 21.1% to 24.8%; control moved from 21.0% to 21.8%. The observed separation is consistent across four weeks, while the support-contact guardrail moved by +0.08 points against a +0.15 limit. This descriptive comparison does not prove the effect will persist after the novelty period.

Conversion by week

Week	Control	Treatment
W1	21.0	21.1
W2	21.5	22.5
W3	21.7	23.5
W4	21.8	24.8

Line Chart: 8 rows · X Week · Y Completion · 3 fields

Outcome distribution by cohort

Cohort	Min	Q1	Median	Q3	Max
Control	20.3	21.0	21.5	21.8	22.2
Treatment	23.0	23.2	23.8	24.0	24.8

Box Plot: 12 rows · Measurement Completion · 2 fields

04 Experiment evidence

Assignment and guardrail evidence

COHORT	ASSIGNED	COMPLETION	SUPPORT-CONTACT CHANGE
Control	6402	21.8%	+0.00 pt
Treatment	6402	24.8%	+0.08 pt
Eligible holdout	1104	21.5%	No post-assignment exclusion

05 Recommendation

1 Extend to 25% exposure with a support-contact stop

The four-week signal is promising but does not establish persistence. Stop if support-contact change exceeds +0.15 points.

Limited rollout

Accepted CHG-181 R2 baseline

01 Experiment summary

The treatment cohort improved conversion across four weeks. The quality guardrail remained inside its agreed range; the sample does not establish long-term retention.

Eligible new-account cohorts · W1–W4 · randomized control and treatment · conversion and quality guardrail.

02 Performance

Treatment conversion · Week 1 to 4

Before8.2%

After9.8%

Treatment conversion9.8%
Delta 1.6

Target 10%

03 Analysis

Treatment conversion rose from 8.2% in week 1 to 9.8% in week 4; the control moved from 8.0% to 8.5%. The treatment distribution is higher across this sample, with all three cohort checks inside the quality guardrail. Continue only as a limited rollout because these four weeks do not establish long-term retention.

Conversion by week

Week	Control	Treatment
W1	8.0	8.2
W2	8.1	8.7
W3	8.4	9.4
W4	8.5	9.8

Line Chart: 8 rows · X Week · Y Conversion · 3 fields

Outcome distribution by cohort

Cohort	Min	Q1	Median	Q3	Max
Control	8.0	8.2	8.3	8.4	8.5
Treatment	8.2	8.6	9.0	9.5	9.8

Box Plot: 8 rows · Measurement Conversion · 2 fields

04 Experiment evidence

Cohort evidence

COHORT	ELIGIBLE	CONVERSION	QUALITY GUARDRAIL
Control	1198	8.25%	Within quality guardrail
Treatment	1204	9.03%	Within quality guardrail
Holdout	412	8.45%	Monitor mix

05 Recommendation

1 Stage a limited treatment rollout

Pause expansion if the quality guardrail moves outside its agreed range.

Review

Dense technical status

Fresh CHG-173 R2

01 Operating summary

Line 4 output recovered after maintenance, but two unresolved control checks still constrain the Friday capacity release.

Plant 6 · Line 4 · review window 2026-09-14 through 2026-09-20 · batches L4-260918-A-7741 / B-7742 · owner: Process Engineering.

02 Performance

First-pass yield

96.2%

Delta 1.6

Unplanned downtime

7.4h

Delta -2.1

Target 6 h

03 Analysis

First-pass yield improved from 94.6% to 96.2% after the valve service. Downtime remains 7.4 hours, above the 6-hour limit. Sample 19 is outside the SPC centerline pattern but inside the product specification; treat this as a process signal for investigation, not a customer defect or capability claim.

Fresh supply-chain holdout (vs different Order/Returns holdout)

Fresh CHG-173 R2

01 Overview

The Q4 capacity plan covers baseline demand, but a long-lead actuator constraint leaves the launch buffer exposed.

Northstar launch · weeks 38–45 · supplier feed closed 2026-09-23 18:00 UTC · demand scenario P70 · allocation review for Operations and Procurement.

02 Performance

Confirmed capacity · W38 to W45

Before120000units

After142000units

P70 capacity headroom

2.7%

Delta -5.3

Actuator lead time

116 days

Delta 26

Target 8%

Target 90 days

03 Analysis

Confirmed capacity exceeds the P70 baseline by 2.7% in aggregate. Another 27,500 actuator units remain unconfirmed across two suppliers; the 116-day lead time makes that small buffer fragile. Do not treat planned capacity as firm supply until the dated allocation lands.

Demand by week

Line Chart: 8 rows · X Week · Y Demand units · 4 fields

Confirmed capacity by week

Line Chart: 8 rows · X Week · Y Confirmed capacity · 4 fields

04 Evidence

Allocation decision path

Reconcile P70 demand

Reserve qualified actuators

Confirm date-coded allocation

Release remaining build

SUPPLIER / PART	COMMITTED	UNCONFIRMED	LEAD TIME	DECISION EVIDENCE
Northstar Motion / AX-8841	72000	18000	116 days	Reserve qualified stock now
Apex Controls / actuator-22B	54000	9500	98 days	Date-coded allocation pending
Orion Systems / NX-041-REV-C	39000	0	42 days	Capacity confirmed through W45

05 Decision

1

Reserve critical actuator supply before releasing the balance

Aggregate headroom hides a concentrated 16-week lead-time constraint. Do not treat unconfirmed supplier allocation as available capacity.

At risk

06 Next steps

✓

Next step: reserve 18,000 qualified actuators now, then release the remaining build only after supplier NC-8841 confirms its dated allocation.
